

Q Dispo

Handling complexity has never been easier.

Documentation | GPS-Tracking | Saving of time | Mobile Orders

Q Dispo

With Q Dispo, you can plan and manage your resources with just a few clicks and collect requirement notifications as they arise.

Advantages

- Plan and control primary and secondary resources
- Get mobile demand and availability messages
- Allocate costs to cost centers automatically (ERP interface)
- Check vehicle fleet availability

Transports and Delivery Notes

Equipment Dispatching

Operation Site

Q Dispo

- clearly presents all the requirements on one centralised platform. Thereby Q Point-users shine in the supreme discipline: material and resource planning.
- is the excellent Buddy for any dispatcher.
- cross-links all data points within construction processes according to logic criteria.

Availabilities, transport requirements, maintenance procedures, related operating personnel up to refuelling and automatised cost centre allocation in connection to ERP systems – Q Dispo supports dispatchers with all tasks in real-time.
