

# Q Compaction

**Universal Plug & Play System for asphalt and  
earthwork rollers.**

Real Time Compaction | Documentation | Visualisation

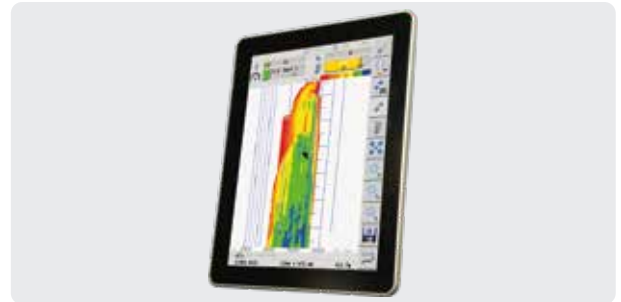

## Q Compaction

Q Compaction is an intuitive assistant system for comprehensive compaction monitoring for earthworks and paving.

### Advantages

- Records compaction and temperature data
- Guidance system
- Convenient plug-and-play connection
- Easy to use

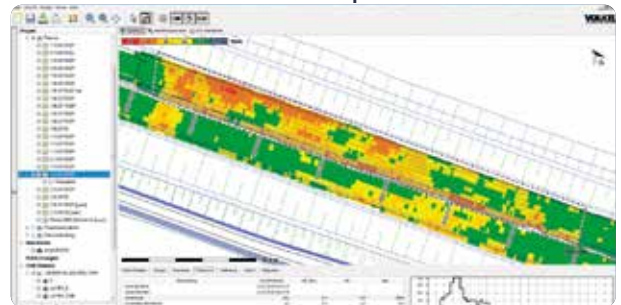

### Navigator-Display

### Features

- Analysis and evaluation features
- Administration options for the construction site
- Automatic data synchronisation
- Unified program and database

### PC-Software CompactDoc

## Q Compaction

- automatically records soil stiffness values without any manual action by the compactor driver and adds geodata from a GNSS receiver.
- When carrying out paving jobs, it is crucial to complete compaction within a specific time frame. Here, Q Compaction assists the paving team in a setup with multiple compactors that are interconnected.
