

Handling complexity has never been easier.

Mobile resources order | Efficient disposition of machines,
transport and staff | accounting

Dispatching

With Q Dispo, you can plan and manage your resources with just a few clicks and collect requirement notifications as they arise.

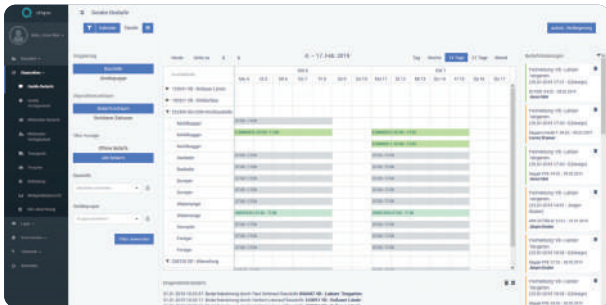

Advantages

- Planning and control of all resources
- Mobile requirement and availability notifications in the web shop principle
- Automatic assignment to cost centers
- Fleet availability check

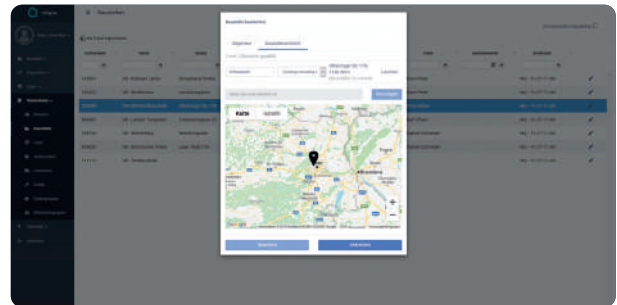

Transports and Delivery Notes

Equipment Dispatching

Operation Site

Q Dispo

- clearly presents all the requirements on one centralised platform.
- maximizes machine utilization through efficient resource management
- offers the construction sites a modern way of registering the requirement using an app
- enables error-free accounting
- offers a wide range of options for integration into the existing IT landscape

Availabilities, transport requirements, maintenance procedures, related operating personnel up to refuelling and automatised cost centre allocation in connection to ERP systems – Q Dispo supports dispatchers with all tasks in real-time.
