

Essential

Digitally manage mix orders and provide construction clients with optimal service along the entire ordering process.

Q Plant Essential allows for a digital, error-free and transparent communication between mixing factories and construction sites. Additional costs as well as mistakes can be thereby avoided. The transparent process additionally provides the basis to keep current work processes efficient and cost-optimised.

15,000 – Expense per year:
Mixing plant personnel deals daily with customer inquiries regarding delivery bills and lists.

50,000 – Additional costs per year:
For energy and emissions due to discontinuous production.

10,000 – Damage:
Delivery time incorrectly noted with the order. Delivery trucks arrive on site a day too early.

30,000 – Damage:
Due to miscommunication, the wrong material is delivered and installed at the construction site.

Advantages for the mixing plant

Create the base for an optimised manufacturing-plant – The transparent and easily comprehensible ordering system allows you to run a resource-efficient manufacturing plant — saving time, energy, emissions and costs.

Increase customer loyalty – By offering a digital solution that covers the initial mixing order all the way to the delivery bill, you offer your customers a future-oriented service.

Save time – Reliable order status communication between mixing plant and construction site reduces the need for telephone calls and eliminates the need for constant availability.

Get started – No process adjustments and without major implementation effort. Sign up and start using. Digitalisation is that simple.

Advantages for customers of the mixing plant

Transparency across the supply chain – Real-time information during assembly allow for a transparent supply chain and provide the construction site with continuous insight into the amount of materials used. The foreman can therefore concentrate fully on the needs of the construction site.

Reduce administrative effort – Delivery information is transferred digitally and reduces the amount of administrative effort needed at the construction site.

Always up to date – Construction manager, site foreman and mixing plant all have the most up-to-date and consistent information available to them at all times. Misunderstandings and miscommunication are both things of the past.

Install the app and start working immediately – Available on all mobile devices (tablets or smartphones)
