

Enterprise

**Simple planning and continuous paving
at the right mix temperature.**

Documentation | GPS-Tracking | Cost Reduction | Mobile Orders

Enterprise

The modern, digitized road construction is not limited to the process of realisation. State of the art process controls like Q Site Enterprise link and control the whole construction process. Q Site Enterprise enables easy and fast planning of complex construction sites in just a few minutes.

Advantages

- Optimised planning and execution
- Just-in-time logistics
- Real-time information for everyone involved
- Complete documentation of all processes

Planning of Resources

Cost Control

Item	Material	Unit	Unit Price	Quantity	Value	Unit Price	Value
1000000	Asphalt	m³	120.00	1000	120000.00	120.00	120000.00
1000001	Gravel	m³	80.00	1000	80000.00	80.00	80000.00
1000002	Sand	m³	60.00	1000	60000.00	60.00	60000.00
1000003	Water	m³	10.00	1000	10000.00	10.00	10000.00
1000004	Labor	h	50.00	1000	50000.00	50.00	50000.00
1000005	Equipment	h	100.00	1000	100000.00	100.00	100000.00
1000006	Transport	h	30.00	1000	30000.00	30.00	30000.00
1000007	Insurance	h	20.00	1000	20000.00	20.00	20000.00

1000009	Waste disposal	h	10.00	1000	10000.00	10.00	10000.00
1000010	Other	h	5.00	1000	5000.00	5.00	5000.00

BIM 5D Planning

Highlights

- is the most advanced process control software worldwide.
- organises building processes in road construction over the whole value chain.
- provides helpful metrics that make it easier, faster, and more successful to build.

The influence of every modification to all other parameters within a construction project is processed. Thus you avoid friction loss at the interfaces of singular process steps and increase the efficiency of the whole construction from the mixing plant to the vehicle fleet up to your construction site.
