

Entry

Getting started with the digital ordering and delivery process.

This edition provides basic functions.

Digital communication | Transparent supply chain | Project management

Entry

Q Site Entry can be made available free of charge to its customers by a mix supplier with a valid Q Plant license. The digital process is only possible with this mix supplier.

Advantages

- Digital ordering and delivery process
- Transparent information exchange
- Real-time information during paving
- Overview of all construction projects
- Efficient and cost-optimized workflows

Objekt 10	Standort 10	Art 10	Status 10	Rechnung 10	Bestellung 10	Bestand 10

Project overview app

Features

- Order and delivery process*
- Communication*
- Project and order overview
- Management of master data
- Workspace settings

Interfaces

- Orders (suppliers)*
- Delivery notes receipt (suppliers)*

* Can only be used with the sponsoring supplier.

Q Site Entry allows digital orders to be sent to the sponsoring mixer using the SiteBuddy app or by using the web portal. All communication can also be handled using this digital solution. If the supplier provides digital delivery note information, this will be displayed in Q Site Entry immediately after delivery. The representation of the expected arrival time at the construction site helps to optimally organize the construction process. All information is automatically exchanged between the people involved in the construction project.
